

# Elixir Wash Cloth

**Leading** the way in specialist printing consumables

ELIXIR pre-impregnated automatic blanket cleaning rolls are the most cost-efficient solution for today's blanket and impression cylinder cleaning for your printing press requirements.

The fabric is synthetic, it contains **NO** wood pulp, reducing the potential for lint left on the blanket after the cleaning cycle.

ELIXIR is compatible with all existing Baldwin Impact® pre-moistened cleaning systems.

## Benefits

### Cost Efficient

Longer rolls mean less changeovers and more press up time

### Compatible

Works with most existing sheet-fed and web press pre-moistened blanket cleaning systems

### Good for the Environment

The specially formulated Elixir solvent uses low VOC levels (less than 1%)
