

Inking

Endura rollers are manufactured by BFS Pressroom Solutions in the UK, the Endura range contains high quality compounds for all applications including conventional and UV printing.

Endura compounds suit all print processes from sheetfed up to the highest speed web-offset. Rollers are available for gravure, flexographic and packaging and are suitable for presses of all ages.

Endura Compound CP1120, CP1290, CP1130

Colour: Black

Shore Hardness: 30, 35, 40

Compound Properties

PVC/Nitrile based offset rubber inker compound

Suitable for printing with conventional, hybrid and UV inks

Excellent dimensional stability in pressroom environments

Compatible with both conventional and UV washes

Suitable for conventional and vegetable oil based inks

Printing Applications

Continuous Stationery/Narrow Web/Envelopes

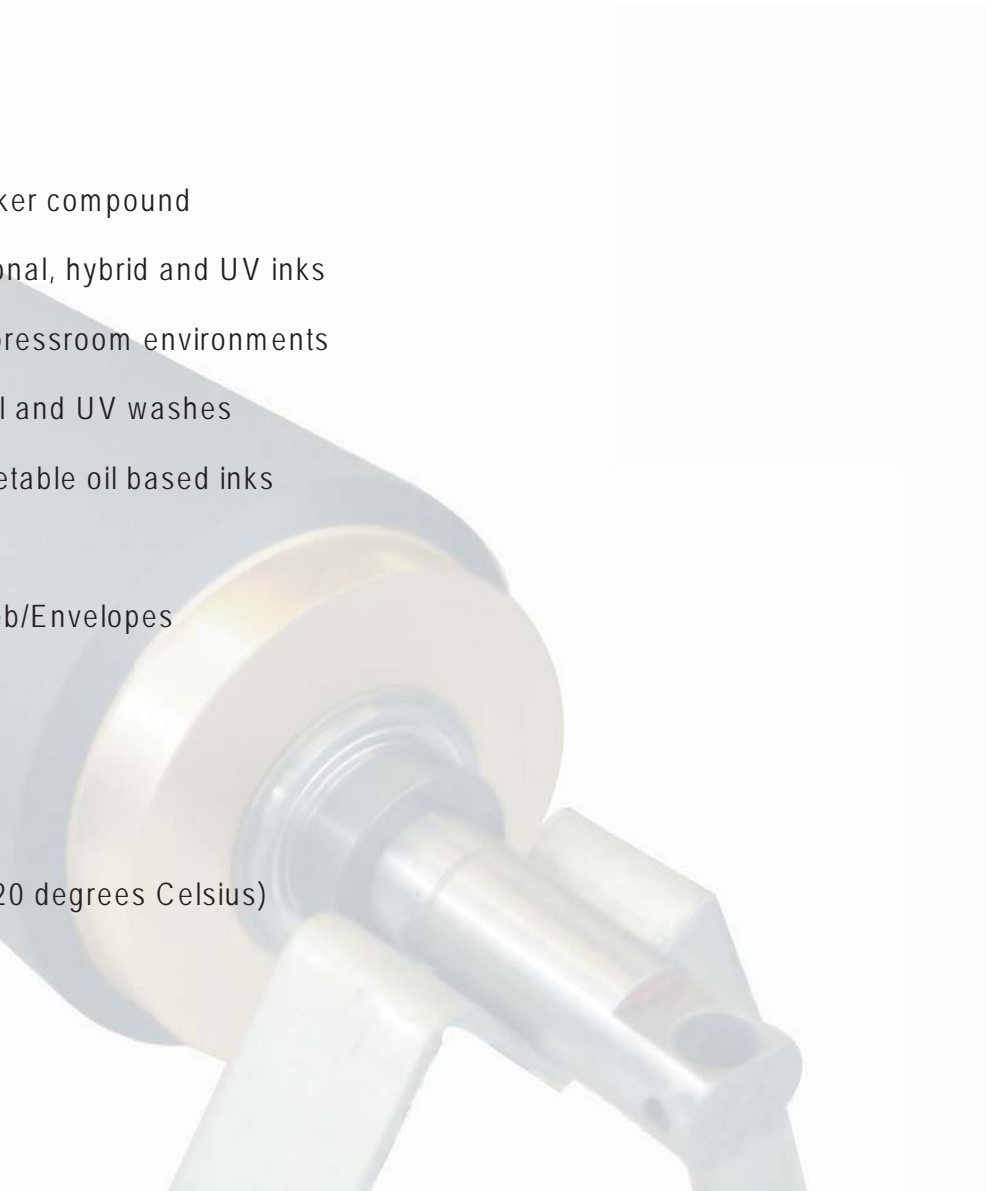

Sheetfed

Storage Conditions

Away from direct sunlight

Constant Temperature (optimum 20 degrees Celsius)

Non-contact with rubber
