

New Generation 3-Ply Blanket for Water Based Coating

ICON - SF Strip

■ Special Design for Spot Varnishing

The new carcass design guarantees easy stripping, either by hand or by plotter.

Just beneath the compressible layer there is an elongation resistant rigid rubber layer that enables the re-use of the blanket.

■ The Best Varnish Transfer

ICON-SF Strip is not just another easy stripping blanket like many others that sacrifices compressibility. Its special formulated rubber compound (for aqueous varnish) and special compressible layers provide excellent coating coverage and easy peeling without compromising its many excellent features.

■ Specifications

Type	Compressible 3 ply
Thickness	1.95mm / 0.077"
Compressibility N/3cm ²	650
Colour	Light Blue
Tensile Strength (N/mm)	105
Elongation at break %	3.0

■ Features & Benefits

- Sufficient stencil depth. (1.05mm down to compressible layer)
- Uniform and even stencil depth
- No fiber pull
- Easy peel at 1.1 N/mm
- Sharp edge cutting by hand or plotter
