

The Ultimate Value is Performance

# Supacoat FP-75

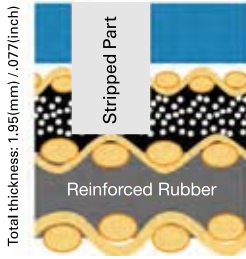

**Dual purpose coating blanket for the application of UV and aqueous coatings**

## ■ Superior Coating Performance

Fujikura FP-75 blankets use a special surface rubber formulation to guarantee a smooth and even transfer onto all substrates at high press speeds.

## ■ Simple to Cut and Peel with Good Relief Depth

The surface and first fabric layer can be cut and peeled away quickly and easily from the compressible layer, leaving a relief depth of 0.95mm.

Specification		Cross Section
<b>Type</b>	Compressible	 <p>Total thickness: 1.95(mm) / .077(inch)</p> <p>Stripped Part</p> <p>Surface Rubber + 1st Fabric</p> <p>Compressible Layer</p> <p>Carcass Layer</p> <p>Reinforced Rubber</p>
<b>Thickness</b>	1.68 / 1.95(mm) .067 / .077(inch)	
<b>Color</b>	Blue	
<b>Hardness</b>	82 (Shore A)	

## ■ Benefits

- Smooth and even transfer of coating onto all substrates
- High resistance to swelling
- Quick and trouble-free stripping from a unique compressible layer
- Outstanding flexibility for fast and simple mounting on the cylinder
- High endurance and dimensional stability
- Available in thicknesses of 1.68mm and 1.95mm
