

Leading the way in specialist printing consumables

'Finito' Universal Underblankets are designed to last up to **six times longer** than conventional packing.

Finito replaces old underpacking blankets and calibrated papers, with an exclusive innovative material eliminating all the storage and management problems of conventional underpacking.

Whilst slightly more expensive than traditional packing, the initial extra cost is a smart investment over a period of time. Finito also boosts productivity by drastically reducing down time.

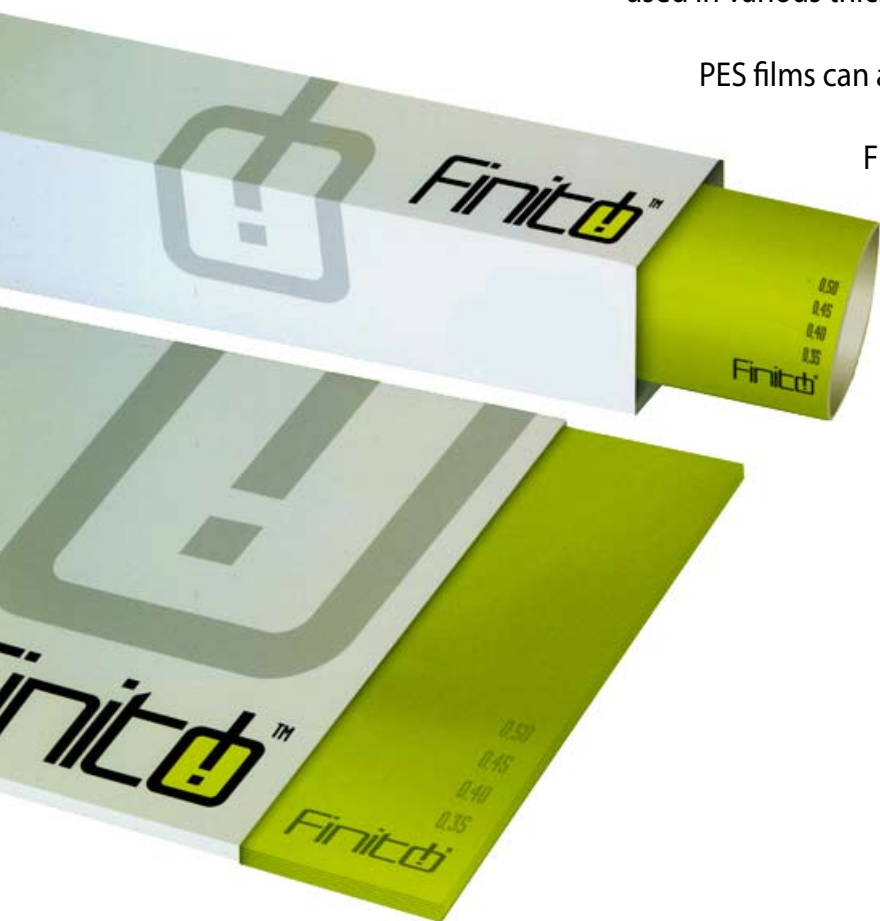

How does 'Finito' work?

Finito enables the right thickness to be easily achieved. Finito is installed on the press just like underblankets and/or calibrated papers.

The core structure is a modified TPU (thermoplastic polyurethane), used in various thicknesses, calendared to a PES film (polyester).

PES films can also be inserted inside the polymeric master.

Finito is available with or without adhesive in all thicknesses and sizes.

The Benefits

- Reduces Press Down Time
- Increased Slur Stability
- Optimal Compression Resistance
- Environmentally Friendly
- Adapts to Cylinder Profile
- Lasts up to 6x Longer
- Improved Stability
- High Usage Flexibility
- Solvent Resistant
- Self Levelling

Which **FINITO**™ is right for you?

FINITO 'S'

Non - Adhesive

Elastomeric Film (PES and elastomer) in various thicknesses, characterised by over thickness removable layers

Colour - Acid Green

Surface - Smooth

Tolerance - $\pm 10\text{m}$

Removable over thickness - $50 \pm 5\text{m}$

Shore 'A' Hardness - 76

Cylinder side - PES

FINITO 'W'

Adhesive

Elastomeric adhesived film (PES and Elastomer) in various thicknesses

Colour - Red

Surface - Smooth

Tolerance - $\pm 10\text{m}$

Shore 'A' Hardness - 76

Cylinder side - Adhesived PES

Adhesive sort - Water based

FINITO 'B'

Non - Adhesive

Specially made for high thickness

PES film in Elastomeric blend

Colour - Acid Green

Surface - Smooth

Tolerance - $\pm 10\text{m}$

Shore 'A' Hardness - 86

Cylinder side - BLU elastomeric film
