

**Leading** the way in specialist printing consumables

BFS Pressroom Solutions supply a large range of fragranced inks suitable for offset, dry offset, flexo, screen-printing, acrylic and UV varnishing, spraying and foulard processes.

BFS fragranced inks use 'Micro-encapsulation technology' that protects the essence particle inside resin micro-capsules which then only release the perfume upon slight pressure. This means that a stroke or scratch to the area of ink will release the perfume from within the micro-capsule.

Our fragranced inks are compatible with water, solvent, acrylic and UV systems and can be applied to paper, board, plastic, PVC, cotton or acrylic t-shirts.

These inks are the ideal solution for many different applications including greeting cards, tissue paper, handkerchiefs, invitations, product brochures, newspaper inserts, catalogues etc.

## Our Range

- |  |   |  |  |   |
|--|---|--|--|---|
|  Pineapple    |  Grape         |  Mint         |  Incense      |  Mushroom    |
|  Apricot      |  Green Apple   |  Orchid       |  Rubber Scent |  Garlic      |
