

WERO UV

Compound properties

- High extraction resistance to the used media, also with 30 ° Shore A.
- Excellent ink distribution.
- Easy wash ability (lower resetting times if the inks are changed).
- Minimised heat-build-up.
- Excellent combination between rubber and core to prevent relief.

User Area

- Ink rollers for pure UV printing

Printing Area

- Sheet – fed printing.
- Continuous printing.

Maintenance

- All Fogra approved UV wash agents suitable for EPDM, for normal wash up.
- Minimum of 1 times per month de- glazing, with de-glazer suitable for EPDM.

Storage

- Rubber free from any contact.
- Constant temperature (best temp. 20 degree Celsius).
