## BFS, the Choice for Precision Rubber Roller Manufacture

BFS Pressroom Solutions Ltd is a family run business established in Berkshire in 1986, and well established as a leading UK manufacturer and a trusted supplier of bespoke industrial rollers to a varied market covering, textiles, paper, food, paper, corrugated, metal decorating, printing and steel industry sectors.

Regardless of the application, finding the right roller for your equipment is imperative for you to achieve maximum output without compromising quality. You need confidence in your roller supplier to manufacture solutions using the highest quality materials at a reasonable price. Finally, you need a roller supplier that understands and appreciates the need for you to keep your equipment running.

At BFS we offer a fast, responsive service, highly competitive pricing and an unprecedented choice of options to ensure that your machines run smoothly and to maximum efficiency.

New and recovered rollers are manufactured at BFS in Haverhill, Suffolk. Where we offer customers a regular roller collection and delivery service wherever possible.

# Whatever your roller spec...

## A Complete Service

BFS supplies a complete engineering and manufacturing service enabling you to install the finished roller straight into your machine.

All rollers are engineered to the original equipment manufacturer's, or your own bespoke specifications. If drawings or a sample roller aren't available then a technical site visit is arranged so that detailed measurements can be gathered and the best compounds matched to maximise the performance of the rollers.

## A Wide Variety of Roller Compounds

BFS offers an extensive range of roller compounds from 20 to 100 Shore A including:

- Natural rubbers
- Nitriles
- PVC Nitriles
- Silicone
- EPDM
- Hypalon
- XNBR (Carboxylated Nitrile)
- Teflon coated

...to name but a few.

Please **contact us** for a no obligation quote to discuss your requirements.
